

HOW TO VIEW CCSFO DASHBOARD

To view Dashboard, users must allow access to a non-secure site.

For Internet Explorer browser:

Users must click on the "Show all content" button located at the bottom of the page as soon as the CCSFO Dashboard page loads to display the Dashboard widgets.

Note: The warning message disappears after a few seconds so if a user doesn't click on it quick enough they will have to back out and navigate back to the CCSFO Dashboard page.

For Firefox browser:

Users must click on the shield icon located in the address bar, then click on the drop-down arrow and select "Disable Protection on This Page" to display the Dashboard widgets.
